ABOUT GUAM:

- ◇ Guam is the largest and southernmost island of the Mariana Islands in the western Pacific. It is located about three-quarters of the way from Hawaii to the Philippines.
- ◇ In 1521, Ferdinand Magellan, a Portuguese Navigator landed on Guam. In 1565, Spain claimed Guam. Guam is currently a United States Territory with an area of approximately 215 square miles. It is located approximately 6,000 miles to the west of the U.S. mainland.

ABOUT THE LIBRARY:

- ◇ The Guam Public Library System (GPLS) officially opened January 31, 1949.
- ◇ Provides library service to all residents on Guam, a United States Territory. The Nieves M. Flores Memorial Library is the Main Library and is centrally located in Hagåtña, which is also the capitol of Guam.
- ◇ GPLS also consists of 5 library branches located in the villages ("village" – small island communities) in certain villages on island to at least accommodate the island community in the northern (Dededo), central (other than Main Library-Hagåtña, also in Barrigada), and south (Agat, Merizo, Yona) areas.
- ◇ The original collection had 13,000 books, mostly from deactivated Navy libraries and a donation from the Los Angeles Public Library.
- ◇ Library was originally in two quonset huts near the Agana Azotea and opened only 20 hours per week with only 3 staff.
- ◇ 1951, began a Guam Collection.
- ◇ 1953, Bookmobile service began, reaching remote villages using a panel truck.
- ◇ 1954, the Library became an independent government agency, no longer a part of the Department of Education.
- ◇ January 1960, the Library moved out of its quonset huts into the first floor of what had been the Guam Administration Building.
- ◇ Growth continued in 1968 with acquisition of the 2nd floor and the addition of air conditioning. In 1979, the third floor of the N. M. Flores Memorial Public Library was completed transforming the structure to what it is today.
- ◇ Branches open: Agat and Dededo Libraries completed in 1968; Barrigada Library in 1970; Merizo Library in 1974; and the Yona Library completed in 1993.
- ◇ In 1990, a Thomas Built Bookmobile was purchased. Later grounded for several years due to lack of funding and personnel.
- ◇ In 2004, through the efforts of First Lady Joann Camacho and public-private partnerships and the generous donated resources from Matson Navigation Company and the Alexander & Baldwin Foundation, the Bookmobile was repaired and operated at no cost to the taxpayers of Guam.
- ◇ South Pacific Petroleum Corporation (76/Circle K) has generously donated the gasoline to run the Bookmobile.
- ◇ To date, all six of the Guam Public Library System libraries and the Bookmobile are open to the public.

FUTURE OUTLOOK

- ◇ The Guam Public Library System (GPLS) Five-Year Plan and Technology Plan are plans used when implementing programs at GPLS.
- ◇ It is GPLS' continued goal to promote and encourage literacy to the community beginning with the young (children, teens and young adults), adults and the elderly.
- ◇ GPLS continues to build its literacy programs and enhancing its library programs and services by having more resources through grants from the Institute of Museum and Library Services (IMLS). IMLS is the GPLS major grantor.
- ◇ Grants have provided the GPLS with the resources to update its computer hardware/software, purchase new library furniture, purchase new books (although would like to purchase more), and other library resources and library supplies.
- ◇ GPLS submitted a FY2011 Capital Improvement Project grant proposal for the construction of additional space at the Main Library, which is centrally located in Hagåtña, Guam. This project is for a new children's literacy area and space for the administrative support unit, including the Director's Office and personnel, conference room, and additional storage.
- ◇ GPLS is highly understaffed. Other Employees are used in order to do work for positions that are unfilled. Having these positions filled would greatly contribute to improving time management and the processing of library materials.

GPLS TECHNOLOGY

Currently all the GPLS library branches are on the GTA Metro E (5 mbps Bandwidth). In addition, the GPLS Internet is upgraded to 5 mbps.

85% of the GPLS Technology Plan defined on the "GPLS Technology Plan, October 2008-September 2011" has been completed based on the network infrastructure that is currently implemented. This includes the local area network (LAN) and wide area network (WAN) thus establishing the GPLS domain environment centralizing control of all remote sites to the Main Library branch in Hagåtña.
